

**AN ORDINANCE AMENDING TITLE VI PHYSICAL ENVIRONMENTAL
OF THE LIVERMORE CITY CODE
CHAPTER 5 UTILITIES – BILLING CHARGES**

BE IT ORDAINED this 9 day of August, 2016, that the City Code of the City of Livermore is hereby amended to include the following new provision relating to waste dumpsters.

Sub-Paragraph 6-5-13.5 – DUMPSTERS – The use of dumpsters as waste storage containers may be permitted, from time to time, by the City Council following written application by the property owner or responsible party for such use. Only dumpsters provided by the City of Livermore or contract garbage collectors as may be employed from time to time by the City shall be permitted. Except as stated herein below, privately contracted dumpsters shall not be permitted by the City of Livermore. Dumpsters shall be of such configuration and size as may be determined from time to time by the City Council and individuals using these for commercial or residential purposes shall abide by such additional restrictions as by resolution the City Council may attach to the use thereof. The City Council shall, by independent resolution, establish rates and user fees for such dumpsters.

This ordinance shall not apply to dumpsters temporarily placed for special projects such as construction, special events and disaster clean-up. In such event, individuals may privately contract with waste removal services for the placement of dumpsters and there shall be no size restriction thereon. The City Council may, however, from time to time establish regulations as to the length of time such dumpsters may be placed and, as to a particular use, where such placement should be made.

For purposes of this section, the term "Dumpster" shall include any container capable of being rolled off or lifted off from a transport vehicle containing open bins or compartments in which to dump waste and which further contain either hinged doors or other means of closure by which the waste may be secured.

Dumpsters shall be placed on a solid surface and shall be positioned so as to be easily accessible to be emptied.

Dumpsters placed in front yards shall be fenced or enclosed so that dumpster will not be visible from the road.
